

STAAR Corp. distributes construction materials and specializes in providing innovative material solutions to the Utility/Communication/Electrical Industries.

While STAAR Corp. President Veronica Rebar and CEO Damian Ramirez were putting bids together at the onset of the company, they noticed a big problem with purchasing materials. They were forced to purchase full reels of HDPE, Fiber Optic Cable, and large quantities of couplers and various other materials in order to meet minimums set by the suppliers. This greatly cut into their profitability on small jobs and required them to unwillingly spend working capital on material stock that might not be utilized for several months.

This led to their "Bid It To Win It" material distribution program. The program allows contractors to purchase the exact quantity of HDPE or Fiber needed for a particular job, by having STAAR Corp. spin custom reels of poly/fiber instead of forcing customers to purchase full reels. For a small premium, the company not only spins custom reels, they also provide an itemized invoice for each specific job for easy cost allocation and accounting.

The "Bid It To Win It" program is also environmentally conscience by avoiding the waste generated by having partial reels leftover, which are too small to complete most jobs. STAAR Corp. will purchase partial reels back from our customers at a discount to fuse back into the reel sizes our customers require.

In butt fusion joining, mating surfaces are prepared, mating faces are melted with a hot-plate heater, the heater is removed, and the melted surfaces are pressed together and held under pressure. As the molten materials cool, they mix and fuse into a permanent, monolithic joint. This environmentally repurposed poly is then able to be placed in trenches or utilized as innerduct.

STAAR Corp sells utility construction materials through our yard on the south side of Chicago as well as utilizing drop-shipments. We offer products such as, Fiber Optic Cable, HDPE, PVC, GRC, Maxcell, Couplers, Pull Tape, Handholes, Aerial Hardware, and Tracer Wire, although this is not an exhaustive list. We work with numerous manufacturers to assure the highest quality materials for your project. Please feel free to inquire, as STAAR Corp is able to obtain just about any specialty utility construction product.
